

multiSUB Choice

With its three tray options, multiSUB™ Choice offers a wide degree of versatility.

Three tray options are available – 15 x 7cm, 15 x 10cm and 15 x 15cm – allowing the choice of one, two or all three gel length options at the time of purchase. Maximising comb and tray options allow up to 210 samples to be resolved per gel. The 15cm total run length allows restriction fragment or other close MW sample bands to be easily separated and identified. Speed loading is accomplished using 10, 14, 16 and 28 sample multichannel pipette compatible combs.

multiSUB™ Choice Stretch units are available with optional 15 x 20cm and 15 x 25cm gel trays and four 28-sample combs for those researchers wanting to perform higher resolution separation of more samples over a longer distance. multiSUB™ Choice Trio includes all 3 tray sizes for optimum versatility and value. For Power Supplies, see page 60.

multiSUB Choice Trio
includes all 3 tray
sizes for optimum
versatility and value

multiSUB Choice Stretch
increases sample
capacity to 350

KEY FEATURES

multiSUB Choice is ideal for restriction fragment analysis, sample prep or checking of high numbers of samples.

- Three tray options
- Run up to 210 samples
- Low buffer volumes
- Multichannel pipette compatible combs for speed loading

ORDERING INFORMATION
