

With gel tray options of **10 x 7cm** and **10 x 10cm**, multiSUB™ Midi has been designed for routine horizontal gel electrophoresis.

Extending only the width of this unit allows more samples to be resolved per gel than multiSUB™ Mini without a significant increase in buffer or gel volumes. A maximum of 100 samples per gel can be resolved making this unit ideal for those routinely checking medium numbers of samples over short to medium gel run lengths. Scoops available as an option to allow safe transfer of gels. For accessories see page 17 and for Power Supplies, see page 60.

Casting Dams

allow gels to be rapidly cast externally while the multiSUB™ unit is in use for gel running, see pages 6 and 17

Adhesive Loading Guides

allow easy well identification and sample loading, see page 17

KEY FEATURES

These units offer the same tray lengths as the multiSUB Mini but in a wider format, to run more samples just as economically under similar running conditions. Ideal for quick checks of samples from PCR and cloning:

- Available with 10 x 7cm, 10 x 10cm or with both gel trays
- Run up to 100 samples
- Low buffer volumes
- Ideal for rapid electrophoresis
